Not a problem – even though I zipped the document, DEC's email system would not send it. I'll send you a link to a FTP site. Gotta love modern technology.

Thanks so much, Terri. I just looked back through my emails and files and cannot seem to find the Barrett tank closure report. My apologies if you already sent it over, but would you mind emailing that to me, as well?

Attached is the 2015 spills work plan (map attached identifies the location of the petroleum spills). I thought I gave you the closure report for the Barrett tank cleanup. If not, I can send it. I also forwarded some Site 108 remedial documents to Pete Reuben with DEC who was going to give them

to Pete Lisichenko a few weeks ago (IRM work plan and the Confirmation Investigation Report). I can send them to you if you haven't seen those documents or want a copy.

Best,
Terri

Hi Terri,

This is helpful to know. Thank you.

Ex. 5 (attorney work product); Ex. 7(a)

Many thanks for the offer to share the old spills work plan. I do think our technical folks would be interested in reviewing that document. If you could send me a copy, I will route it to the site team.

Best,
Margo

Does the EPA technical group want the old spills workplan that governed the petroleum spills before TCC executed the superfund plant site order? It has a map identifying the remedial areas. There were also other releases from sodium hydroxide tanks over the past couple of years in the by-products part of the site.
